

OBJECTIVES

General Objectives

To focus on the various facets of health maintenance of school-aged children and provide opportunities of development and advocacy in specific issues.

Specific Objectives

1. To discuss the common medical problems encountered in school-aged children;
2. To improve the knowledge and skills of pediatric practitioners in dealing with the medical concerns of school-aged children;
3. To discuss recommendations and policies for more comprehensive and effective school health and community programs;
4. To present the current advances in health and wellness in the school-age population.
